

Find the measure of  $\angle x$  and  $\angle y$ .<sup>1</sup>

---

<sup>1</sup>Hosei University Girl's High School, Kanagawa

## Solution

*Answer* :  $\angle x = 35^\circ, \angle y = 60^\circ$

Proof ( $\angle x$ ):  $\angle \mathbf{x} = \mathbf{20^\circ} + \mathbf{15^\circ} = \mathbf{35^\circ}$ .

Proof ( $\angle y$ ):  $\angle \mathbf{y} = \mathbf{20^\circ} + \mathbf{25^\circ} + \mathbf{15^\circ} = \mathbf{60^\circ}$ .
